PROFESSIONAL SUMMARY

Mobile app developer who builds Android and iOS apps with React Native, Expo, Flutter and Kotlin. Uses Firebase and Supabase for authentication, real-time data, push notifications and storage. Experienced in app deployment and ongoing maintenance, with professional development experience at Pine Technologies.

SKILLS

Area	Technologies
Mobile	React Native (Expo managed and bare), Flutter (Dart), Kotlin, Jetpack Compose, Kotlin Multiplatform (KMP), Android SDK
Languages	TypeScript, JavaScript, Dart, Kotlin, SQL
Backend & Data (BaaS)	Firebase (Auth, Firestore, Cloud Messaging, Storage), Supabase, SQLite
Deployment & Maintenance	Google Play Console, App Store Connect, TestFlight, Git, release management, bug fixing and version updates

EXPERIENCE

Software Developer — Pine Technologies, Gilgit · Jan 2023 – Aug 2026

- Developed and maintained software solutions in a team environment, contributing to implementation, debugging and delivery of reliable, production-ready application features.

PROJECTS

QuizMaster — Quiz & Learning App

Kotlin · Jetpack Compose · Firebase · AdMob · Source on GitHub

- Built a category-based quiz app with hints, explanations and progress stats, using Firebase for backend services and AdMob for ads.

eFit — Fitness App

Kotlin Multiplatform (KMP) · Jetpack Compose · Health Connect · Google Play

- Developed and published a fitness app with KMP and Compose, integrating Health Connect for health data.

ForeCruise — Community Hazard & Fuel Reports

Flutter · Dart · Firebase · Google Maps · Google Play

- Built and published a community app for real-time reports on hazards, flooding, fuel availability and local incidents.
- Implemented an interactive map with location-based reports and real-time Firebase updates.

POS & Business Management System — Invoice Management App

Flutter · Dart · Firebase

- Developed a POS and business management app covering sales, billing and invoices, inventory and materials, suppliers, and tender and purchase management.
- Handled Flutter development, UI implementation, Firebase integration and business module development.

Trawander — Tour Guide Booking App

React Native · Expo · Redux Toolkit · Firebase · React Native Paper · React Navigation

- Built a cross-platform tour guide booking app with real-time chat and a real-time booking system.
- Used Firebase for authentication (Google and Facebook login), real-time data and push notifications; integrated payment gateways.

Tashliyeah — Vehicle Parts Bidding App

Expo · React Native · Firebase · Socket.IO · Recoil · i18next

- Developed a vehicle parts bidding app with real-time live bidding using Socket.IO and Firebase for authentication, data and storage.
- Implemented payment and delivery workflows, multilingual support with i18next, and state management with Recoil.

Cloud Gym Manager — Gym Management App

React Native · React Native Paper · REST APIs · Deep Linking · TestFlight

- Developed a cross-platform iOS and Android app with REST API integration and role-based workflows for members, trainers, staff, admins and super-admins.
- Implemented deep linking and tested on iOS through TestFlight before release.

EDUCATION

Qualification	Institution	Period
BS, Software Engineering	Karakoram International University	Sep 2021 – Nov 2025
ICS	Degree College Gilgit	Aug 2016 – Aug 2018
