OBJECTIVE

Results-driven Mobile App Developer building Android and iOS apps with React Native, Expo, Flutter and Kotlin. Experienced with Firebase and Supabase for authentication, real-time data, push notifications and storage, and with app deployment and ongoing maintenance on Google Play and the App Store. Seeking a Mobile Developer position to build scalable, high-quality cross-platform applications.

PROFESSIONAL EXPERIENCE

Mobile App Developer | Pine Technologies (Gilgit, Pakistan) **Jan 2023 – Aug 2026**

- Developed and delivered cross-platform and native mobile apps for Android and iOS using React Native, Flutter, Kotlin and Firebase, including Trawander, Tashliyeah and Cloud Gym Manager.
- Took full ownership of app development on several projects, from UI implementation and feature development to API integration, testing and release.
- Collaborated with team members and UI/UX designers to turn designs into responsive, production-ready screens and features.
- Published and maintained apps on Google Play and the App Store, handling bug fixes, performance improvements and version updates.

PROJECTS

QuizMaster – Quiz & Learning App

Tech Stack: Kotlin, Jetpack Compose, Firebase

- Built a category-based quiz app with hints, explanations and progress stats.
- Used Firebase for backend services and AdMob for ads.

eFit – Fitness App

Tech Stack: Kotlin Multiplatform (KMP), Jetpack Compose, Health Connect

- Developed and published a fitness app with KMP and Compose.
- Integrated Health Connect for health data.

ForeCruise – Community Hazard & Fuel Reports

Tech Stack: Flutter, Dart, Firebase, Google Maps

- Built and published a community app for real-time reports on hazards, flooding, fuel availability and local incidents.
- Implemented an interactive map with location-based reports and real-time Firebase updates.

POS & Business Management System

Tech Stack: Flutter, Dart, Firebase

- Developed a POS app covering sales, billing and invoices, inventory and materials, suppliers, and tender and purchase management.
- Handled Flutter development, UI implementation, Firebase integration and business module development.

Trawander – Tour Guide Booking App

Tech Stack: React Native, Expo, Redux Toolkit, Firebase, React Native Paper, React Navigation

- Built a cross-platform booking app with real-time chat and a real-time booking system.
- Implemented Google and Facebook login, push notifications and payment gateway integration.

Tashliyeah – Vehicle Parts Bidding App

Tech Stack: Expo, React Native, Firebase, Socket.IO, Recoil, i18next

- Developed real-time live bidding using Socket.IO, with Firebase for authentication, data and storage.
- Implemented payment and delivery workflows, multilingual support and Recoil state management.

Cloud Gym Manager – Gym Management App

Tech Stack: React Native, React Native Paper, REST APIs, Deep Linking, TestFlight

- Developed a cross-platform iOS and Android app with REST API integration and role-based workflows for members, trainers, staff, admins and super-admins.
- Implemented deep linking and tested on iOS through TestFlight before release.

SKILL SET

Technical Skills

- **Mobile Development:** React Native (Expo managed and bare), Flutter, Kotlin, Jetpack Compose, Kotlin Multiplatform (KMP), Android SDK
- **Programming Languages:** Dart, JavaScript, TypeScript, Kotlin, SQL
- **State Management & Libraries:** Redux Toolkit, Recoil, React Navigation, React Native Paper, i18next, Socket.IO
- **Backend & Data (BaaS):** Firebase (Auth, Firestore, Cloud Messaging, Storage), Supabase, SQLite, REST APIs
- **Deployment & Maintenance:** Google Play Console, App Store Connect, TestFlight, release management, bug fixing and version updates
- **Version Control & Tools:** Git, GitHub

Soft Skills: Communication | Problem-Solving | Teamwork and Collaboration | Time Management | Adaptability | Critical Thinking

EDUCATION

- **Bachelor of Science in Software Engineering** Karakoram International University **Sep 2021 – Nov 2025**
